ARJUN DESAI

Software Engineer

SUMMARY

Software engineer with 4 years of experience in Python and Java backend development, with a strong foundation in data structures, algorithms and databases.

TECHNICAL SKILLS

Languages: Python, Java, SQL
Core: Data Structures, Algorithms, Databases, Object-Oriented Design
Tools: PostgreSQL, MySQL, Docker, Git, Jenkins, AWS

EXPERIENCE

Software Engineer, Vertex Retail Technologies
Aug 2021 - Present
Develop and maintain inventory microservices in Java and Python. Designed the relational schema for the stock-reservation service. Optimised a reporting query from 14s to 400ms through index redesign and query restructuring. Mentored two junior engineers on algorithms and code review practice.

Junior Developer, Sandhurst Software
Jul 2020 - Jul 2021
Maintained a Python ETL pipeline processing 60GB of daily transaction data. Added retry and idempotency handling. Wrote the unit and integration test suites.

PROJECTS

Scheduling optimiser using a greedy algorithm with a priority queue, reducing warehouse pick times by 22% in simulation.

EDUCATION

B.E. Computer Engineering, Marchmont University, 2020. CGPA 8.2/10.
Coursework: Data Structures, Algorithms, DBMS, Computer Networks.
