RITIKA CHANDRA

Machine Learning Engineer

EXPERIENCE

Machine Learning Engineer, Solstice Analytics
Jan 2022 - Present
Build and deploy demand-forecasting models for retail clients. Own the feature pipeline: pulls from a Snowflake warehouse, transforms in Python with pandas, and writes features to a Postgres feature store. Cut model training time from 6 hours to 40 minutes by rewriting the aggregation step to avoid repeated full-table scans. Deployed four models to production behind a FastAPI service.

Data Science Intern, Solstice Analytics
Jun 2021 - Dec 2021
Built churn-prediction prototypes. Ran the A/B evaluation for the first production model.

PROJECTS

Image classification pipeline on a 60k-image dataset using PyTorch, with a custom data loader and augmentation stack. Reached 94% top-1 on the held-out split.

SKILLS

Python, pandas, NumPy, scikit-learn, PyTorch, TensorFlow, SQL, Postgres, FastAPI, Docker, MLflow, Airflow.

EDUCATION

M.Tech Data Science, Ravensmoor University, 2021
B.Tech Computer Science, Ravensmoor University, 2019
Coursework: Machine Learning, Statistics, Database Systems, Data Structures.
